

Love Physics!

Dear Parents and Carers,

The Ogden Trust is calling for all its young Scientists to take out their cameras/phones!

This is a Photo Competition for the whole school community with a chance to win some amazing science prizes: e.g. microscopes, telescopes and much more.

Competition

Take a photo of **any** real life **physics** activity that happens around you. Show what physics means to you and link with the art of photography.

To give you some ideas, your photo can show anything to do with: motion, forces, electricity, energy, light, sound or space. You can explain the science in your photo and your entry must include your name, class and topic.

Please email your photo to ngentleman@sunnyhill.lambeth.sch.uk with the title 'Love physics' or print it out and hand it to your teacher. Don't forget to include your name!

The photos will be judged by teachers across our Ogden Trust partnership, with a chance to win a first or second prize in different categories!

There can be a maximum of 3 entries per child and parents are also welcome to participate in their own category.

The deadline for the competition is 22nd April 2022.

Winners will be announced the following week!

Start taking photos and good luck!

Nicola Gentleman

Deputy Head Teacher for Curriculum
