

Let's investigate

In our climate change workshop, Mike told us about the amount of co2 that food items produce (e.g. a steak = 5000g, bread = 300g). Do some research and make your own table with foods and the co2 they produce.

Let's Look

Look at the photographs from the environmental photographer of the year (some of them are quite striking but they show some of the issues that threaten our planet.

Let's create

Design a climate friendly school or home. Think about ways in which we can improve our carbon footprint or how we can improve reduce, reuse and recycling across the school.

Let's cook

Design a menu that has a low carbon footprint, using ingredients that can be sourced within the UK.

'Dip and Do' What a Wonderful World Year 6 Spring Term 2023

Let's talk

Create a persuasive speech that you can present to an organisation or the government to encourage them to make changes to the issues of climate change. Share this speech with someone at home and ask them for their opinions. This could turn into a debate. Please record the main points from your debate.

Let's visit

The science museum is due to open a new climate change exhibition. Read about what it will have to offer and consider if you would like to visit this once it opens.

www.sciencemuseum.org.uk

Let's read & write

There are many books on MYON relating to climate change. Please read as many of them as you can and take notes as you read them. Design a poster or a leaflet to share what you have learnt.

Let's Design

Design a poster with a catchy slogan that will get people's attention to raise awareness of climate change and global warming.
